Description

FirstStrike Soft Bait is a new concept in rodenticide technology from Liphatech. It is highly effective and is easy to secure to bait station rods. The most technologically advanced rodenticide on the market containing Difethialone, which was invented and patented by Liphatech, and has half the active ingredient compared to other anticoagulant rodenticides.

- High acceptance by rodents, even when competing food is available
- Unique package design allows aroma to escape, attracting rodents
- Works quickly in high infestation areas
- Maintains palatability and integrity in both hot and cold environments
- Contains no wax, enhancing its palatability to rats and mice
